

INTEGRATED MANAGEMENT SYSTEM POLICY

UNIMET AUTOMOTIVE

Spółka z ograniczoną odpowiedzialnością Spółka komandytowa

UNIMET AUTOMOTIVE's overarching priority is to deliver high quality products on time at competitive prices to ensure stable development.

UNIMET AUTOMOTIVE aims to specialise in products dedicated for steering systems and pipe assemblies. We aim to expand cooperation with our existing clients by introducing more technologically advanced products and those designed for electric vehicles. Additionally, we seek to develop collaborations with clients beyond the automotive sector, aiming to diversify our business and reduce dependence on a single production branch.

As a significant aspect of our operations, we consider the confidentiality, integrity, and availability of all data and information that are important to us.

The objectives shall be pursued through:

- Conducting business in accordance with the principles of sustainable development and the Code of Conduct adopted in the company
- Flexibility, client oriented approach and meeting the customers' specific requirements
- The compliance with legal requirements and other applicable requirements
- The continuous improvement of the effectiveness of Integrated Management System
- Modernization and automation of the machinery park, as well as the implementation of cutting-edge technologies.
- The reduction of production costs and thus ensuring competitive prices
- Implementation of the TISAX standard along with its continuous monitoring and improvement.
- Risk management across all areas of the organization's operations to minimize negative impacts and maximize opportunities for achieving set objectives.
- Minimising the negative impact of our business on the environment, including preventing pollution by: sustainable resources management and waste reduction, GHG emissions reduction, responsible chemical management as well as through care for water and air quality.
- Improving our environmental performance by optimising energy efficiency, water consumption, using renewable energy and choosing alternatives with less environmental impact
